

PRESS RELEASE

ICCSimTMat approved by EMVCo for Entry Point Approval Process

January 15th, 2010 – ICC Solutions is delighted to announce the immediate availability of ICCSimTMat: Entry Point which is approved by EMVCo, and used by accredited test laboratories, for debug and quality assurance testing in connection with the EMVCo Terminal Type Approval Contactless Entry Point approval current process.

This test package is built on the industry recognised ICCSimTMat test platform which is also approved by EMVCo for EMV level 2 type approval used by terminal manufacturers and accredited test laboratories worldwide for development, debug, quality assurance and certification testing.

ICC Solutions Limited is able to offer a complete set of fully qualified test packages for all formal Payment Association certifications (INTERAC, MasterCard TIP, Visa ADVT and ADVT qVSDC Device Module) in addition to EMVCo Level 2 type approval. Additionally, these test tools can also be used during the development phase and internal quality assurance testing in readiness for the formal certification process.

According to Dave Maisey, CEO / Managing Director at ICC Solutions, "ICC Solutions is delighted to receive formal approval from EMVCo of ICCSimTMat: Entry Point in connection with the EMVCo Terminal Type Approval Contactless Entry Point approval process. This demonstrates our ongoing commitment to supporting the EMV industry by extending our portfolio of approved and recommended test packages thereby further enabling efficient, reliable and cost effective testing to be performed."

Please contact info@iccsolutions.com for all enquiries and further information.

ICC Solutions

ICC Solutions is the global leader in the provision of industry recognised Test Tools and Test Scripts (contact and contactless). Powerful and highly effective test tools and test scripts constitute *The ICCSim Portfolio*. The ICCSim Portfolio is used to simplify both device and chip card testing, at the application and functional levels. The Portfolio offers flexibility with rapid speed to market and is invaluable when performing development, acceptance or confidence testing. The ICCSim portfolio is used worldwide by Banks, Retailers, Payment Schemes, Terminal / Card Vendors and EMVCo Test Labs.
