Training cards from ICC Solutions are used successfully worldwide.

Each card has been created to ensure that merchants have the tools necessary to assist with POS and ATM testing.

All of our cards contain a range of common scenarios and are available for all the major payment Brands. Using the cards allows you to ensure that your terminal accepts and correctly processes a selection of payment Brand profiles. Additionally, they can be used to complement staff inductions and ongoing training.

Contact training cards (for cards supporting offline PIN) are configured as follows:

- **PIN validation successful** (1234 or any PIN except 5678/1122).
- **Invalid PIN** (5678).
- **Blocked PIN** (1122) - PIN is not actually blocked so the cards can be re-used.
