

EMV Level 3 testing can be a complex and time-consuming process, requiring specialist expertise and a thorough understanding of payment brand requirements. Our **Testing & Certification Team** can simplify this process, helping customers achieve certification efficiently and with confidence.

Our experienced Testing & QA team provides comprehensive terminal testing and certification services using advanced, industry-leading test environments. We work closely with customers to ensure testing activities are completed accurately, efficiently, and within agreed project timelines.

With 30 years of EMV experience, our team has successfully delivered numerous EMV Level 3 testing and certification projects for terminal vendors and solution providers worldwide. Through this extensive experience, we have developed a deep understanding of the complete certification lifecycle and the common challenges that can arise during testing.

When issues are identified during the testing process, our specialist team works collaboratively with your development teams to diagnose and resolve them quickly. Our knowledge of recurring problem areas enables us to focus attention on potential risks early in the project, reducing delays and helping to achieve successful certification outcomes faster.

We place great importance on building strong working relationships with our customers. Clear communication, regular status updates, and proactive project management ensure complete visibility throughout the testing and certification process.

Our team works with payment brand test plans on a daily basis and has an in-depth understanding of certification requirements, test cases, and pass criteria. In addition, we maintain established working relationships with the major payment brands, enabling rapid clarification of questions and efficient resolution of any test plan-related issues that may arise.

By partnering with us for your EMV Level 3 testing, you gain access to proven expertise, dedicated support, and a streamlined certification process that helps bring your payment solution to market faster.
