## ICC Solutions partnership with Argotechno

ICC Solutions has a long standing strategic alliance partnership in place with Argotechno originally set up with the objective to extend the global reach of both companies. The initial focus was in Latin and South America which is now being extended into other markets, building on the successful achievements realised to date.

The primary focus for the partnership is reselling opportunities of ICC Solutions extensive range of fully qualified EMV level 2 and 3 test tools used to perform type approval and end-to-end payment brand accreditation tests on EMV terminals and POS/ATM solutions.

Furthermore, the partnership is ideally suited to offer both fully qualified test tools, plus testing and consultancy services, necessary to support worldwide EMV migration and growth, in addition to key industry initiatives, such as the introduction of new technologies and payment platforms.

Derek Ross, Head of Sales and Business Development at ICC Solutions, commented: "ICC Solutions is delighted with the level of joint business opportunities resulting from the partnership with Argotechno which offers the ideal synergy combining the diverse core strengths of both companies, thus enabling exciting new business opportunities for the benefit of both companies' client bases, as well as the potential to open up new markets."

According to Alex Gama, Chief Operating Officer at Argotechno, "Argotechno and ICC Solutions have been offering payment solutions, providing test tools, testing and certification services, resulting in a high level of customer satisfaction and cooperation on both sides. Our partnership provides invaluable teamwork between Argotechno's and ICC Solutions' Teams and leverages global opportunities where both companies can act together to achieve new markets and assist new customers."

### About ICC Solutions Limited

ICC Solutions Limited is a global leader in the provision of EMV test tools and services and offers the complete set of qualified test suites for payment brand accreditation of contact and contactless EMV terminals. Our tools are used worldwide enabling development, quality assurance and regression testing in addition to formal merchant certifications.

Working with Vantiv in the USA, ICC Solutions developed VIABLE – an innovative and highly efficient closed-loop solution designed to simplify the EMV enablement, testing and validation process. VIABLE places merchants in full control of their EMV certification activities.
