## Main Features

ICCSimTMat features a powerful user friendly interface that enables very efficient test campaigns, offering exceptional value and are designed to be totally self-contained with no other components required. Automated import / export, analysis tools and user friendly features enable efficient and effective testing with transaction logs easily captured, without the need for complex hardware, restrictive card adaptor, separate spy software or huge card decks.

## What's included in the kit?

- Software test suites
- USB License Key for activation
- Dual Interface Card Reader
- Set of ICCSim Cards
