ICC Solutions is the leading provider of contact and contactless EMV test cards for the merchant retailer market. Training cards from ICC Solutions are used successfully worldwide facilitating in-store training of cashiers complementing induction programmes and ongoing staff training needs. These training cards enable training programmes to be individually tailored by merchants ranging from just one card per store to a complete set for each payment brand depending on each merchant's requirements.

By using the Merchant Retailer Training Cards during training and induction programmes, you can also ensure that your terminal is configured correctly and will accept and correctly process the varied Payment Brand profiles.

Contact training cards for cards supporting offline PIN have PIN values configured for PIN validation successful (1234 or any PIN except 5678/1122), Invalid PIN (5678), blocked PIN (1122) - PIN is not actually blocked as simulated so cards can be re-used.

Card expiry dates are: American Express (Dec 24), Diners Contact (Dec 23), Diners Contactless (May 26), China UnionPay (Oct 30), INTERAC (Dec 24), JCB (Dec 30), Maestro/Mastercard (Dec 25) and Visa (Dec 22).

These training cards are intended for basic transaction / confidence testing and training purposes only and are NOT intended to be used in a live environment. These cards are not suitable for cardholder not present transactions and should only be used with a test host or in training mode on a terminal loaded with relevant payment scheme test keys. These cards have encoded mag-stripe suitable for testing fall-back.

The cards have the mag-stripe encoded. When using a Chip & PIN and mag-stripe terminal, if you swipe the card first then the terminal will request to perform a chip transaction. If the card is then inserted with chip covered or reversed, a fall-back to mag-stripe transaction can be performed. When using a mag-stripe only terminal you may perform a transaction using the mag-stripe instead of chip on the card.

For any card with less than 12 months remaining before expiry, should you wish to purchase, please note that they will not be replaced or refunded once new expiry dates are released.
