

US Merchant Training Cards

ICC Solutions is the leading provider of contact and contactless EMV test cards for the U.S. merchant market. Test cards from ICC Solutions are used successfully worldwide facilitating in-store training of cashiers complimenting induction programmes and ongoing staff training needs. These test cards enable training programmes to be individually tailored by merchants ranging from just one card per store to a complete set for each payment brand depending on each merchant's requirements.

The U.S. Merchant Training Card Packs (Contact & Contactless) comprise the following chip test cards suitable for the U.S. Market:

Contact Only Pack:

- 1 x Visa Credit
- 1 x Mastercard Credit
- 1 x Mastercard Debit
- 1 x US Maestro Mastercard
- 1 x American Express
- 1 x Visa US Debit (Common AID)
- 1 x Discover Credit

Contact & Contactless Pack:

Same cards as the contact pack plus:

- 1 x Visa payWave
- 1 x Mastercard PayPass
- 1 x Mastercard PayPass Magstripe
- 1 x US Maestro PayPass
- 1 x ExpressPay
- 1x Discover Contactless

Individual Cards:

- China UnionPay 8 Series BIN – Contact
- China UnionPay 8 Series BIN – Contactless

Fleet Test Card Pack:

12 x Test Cards

The U.S. Merchant Training Card Packs facilitate basic Confidence Tests on chip card terminals, ensuring that the terminal is configured correctly and will accept and correctly process a selection of Payment Brand profiles.

Contact training cards for cards supporting offline PIN have PIN values configured for PIN validation successful (1234 or any PIN except 5678/1122), Invalid PIN (5678), blocked PIN (1122) - PIN is not actually blocked as simulated so cards can be re-used.

Card expiry dates are: American Express (Jan 20), Maestro/Mastercard (Dec 25) and Visa (Dec 22).

These test cards are intended for basic transaction / confidence testing and training purposes only and are NOT intended to be used in a live environment. These cards are not suitable for cardholder not present transactions and should only be used with a test host or in training mode on a terminal loaded with relevant payment scheme test keys.

These cards have encoded mag-stripe suitable for testing fall-back. When using a Chip & PIN and mag-stripe terminal, if you swipe the card first then the terminal will request to perform a chip transaction. If the card is then inserted with chip covered or reversed, a fall-back to mag-stripe transaction can be performed. When using a mag-stripe only terminal you may perform a transaction using the mag-stripe instead of chip on the card.

A pack of fleet test cards is available, covering the full set of contact and contactless Mastercard Fleet Prompt Data Profiles. The fleet cards are intended for in-house testing by POS and terminal developers for fleet applications as part of the software development cycle.
