

Vantiv VIABLE

For Contact and Contactless

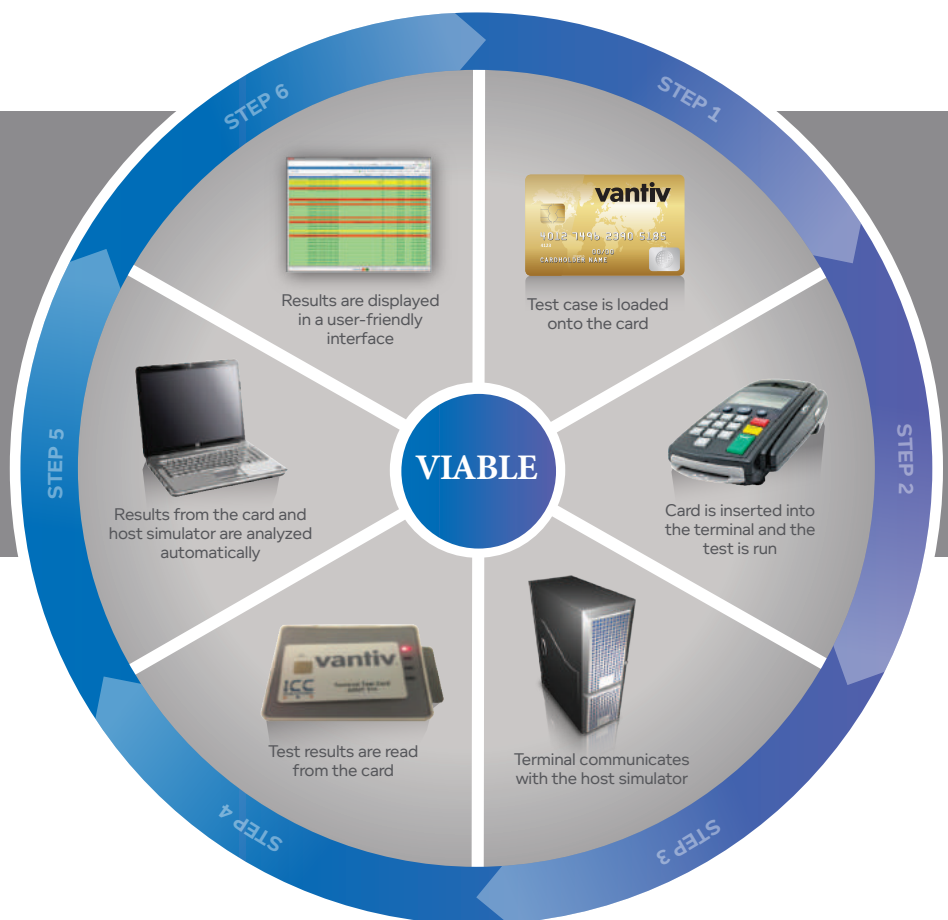

Chip Terminal Configurations

VIABLE Test Kits

Leading-Edge Tools For EMV Testing

Vantiv In a Box Leveraging EMV (VIABLE) test kits, approved by **American Express®**, **Discover®**, **MasterCard®** and **Visa®**, enable merchants and ISVs to perform **EMV chip terminal integration** and **certification testing** in a unique closed-loop environment that allows control and flexibility in their EMV testing process.

Utilizing an industry-leading closed-loop environment, the **VIABLE test kits** provide merchants and ISVs with an EMV testing solution that sets the standard for ease and efficiency and represents the cutting edge of EMV testing.

VIABLE test kits, built on the ICC Solutions platform, are easy to use and ideal for testing any type of merchant or ISV EMV contact and contactless chip terminal configuration. Automated import/export, analysis tools and user-friendly features enable efficient and effective testing. Transaction logs are captured easily without the need for complex hardware.

In addition, the host simulator software provides acquirer authorization request and response simulation, eliminating the need to connect online with the Vantiv test host.

Our **VIABLE test kits** include a Quick Start Guide and login details that allow access to a secure client area. From there, merchants and ISVs will be able to download the VIABLE software and configuration files. This site also provides access to the VIABLE helpdesk. Access to the software is granted via a USB license key. Once installed and accessed, the test cards and card reader work with the software to manage and execute a customized test plan.

System Requirements

Operating System:

Windows® 8.1
Windows® 8
Windows® 7
Windows® Vista SP1 +
Windows® XP SP2 +

Free Disk Space:

100 MB

Software requirements:

.Net framework v4.5
.Net framework v3.5 SP1

Processor:

Pentium III or higher

Optional:

Microsoft Office 2003+
(for import and export of some reports)

Memory:

1 GB minimum

VIABLE test kits* include:

- ✓ Quick Start Guide
- ✓ Testing software required for American Express, Discover, MasterCard and Visa
- ✓ Host Simulator Software
- ✓ USB License Key for activation
- ✓ Dual Interface Card Reader
- ✓ Test Card Set

*Hardware is shipped via courier and software distributed via download
